

KENTUCKY BLUEGRASS

TURF

Prosperity  
Kentucky Bluegrass  
How low can you go?

**PROSPERITY** Kentucky Bluegrass provides outstanding turf quality, very dark color, and tolerates low mowing. Prosperity has a low growth habit and high density, with a medium-fine leaf texture and a very dark blue-green color. Prosperity demonstrates high heat tolerance as well as excellent leaf spot resistance, stripe rust resistance, and powdery mildew resistance.

- High heat and drought tolerance
- Low growth habit
- Tolerates low mowing
- Proven performance record
- Superb disease resistance

## PERFORMANCE DATA

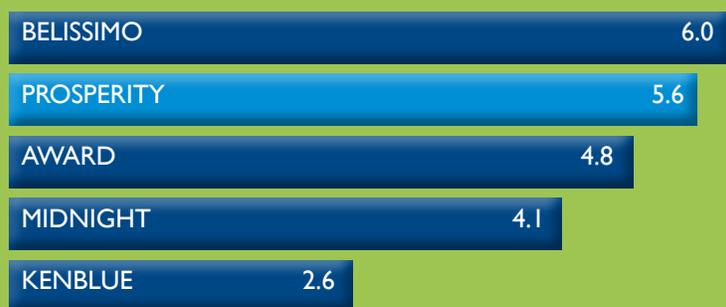

### TURF QUALITY

Performance of Kentucky bluegrass cultivars and selections in a turf trial Sept. 2007 in North Brunswick, NJ; 1-9, where 9 is ideal (LSD=0.8)

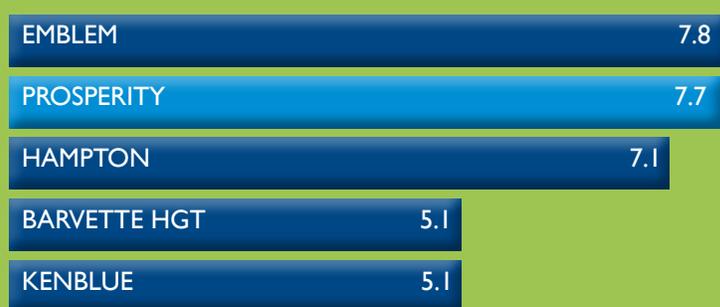

### DROUGHT TOLERANCE

NTEP 2006-10 data. Drought tolerance (dormancy) ratings of Kentucky bluegrass cultivars: 1-9, where 9 is ideal (LSD=1.5)

### GENETIC COLOR

NTEP 2006-10 data. Genetic color ratings of Kentucky bluegrass cultivars grown in twenty U.S. locations: 1-9, where 9 is ideal (LSD=0.3)

Prosperity has been entered in trials under the designation PST-Y2K-59
