

***GO Seed Research Partners***

GO Seed varieties are developed and marketed through rigorous scientific investigations with much of the work performed by third party research organizations. We encourage the comparison of our products to competitors and assessing their performance in innovative systems. We look forward to discussing your ideas and using our expertise in soil health, varietal strengths, and our understanding of the markets to be collaborative partners in your research program.

We are actively seeking systems-based research projects in collaboration with farmers and land managers who will communicate during decision making processes, are willing to follow specified protocols, and agree collect samples for analysis.

**For seed requests**, the application is required a minimum of one month before seed is needed.

Date:

Organization and Title:

**Select one of collaboration types below:**

**Request for research seed**

Name of Proposal:

Principle Investigator / Research Leader Name:

Research Organization(s) and or Farm Name(s):

Date seed to be planted:

Region where research will take place:

All crops planned to be grown in the trial:

Background or observation instigating the trial (50-word max):

Primary objective (50-word max):

Secondary objectives (optional 100-word max):

Experimental design summary (100-word max, bullet point format encouraged):

Management methods (100-word max, bullet point format encouraged):

Analytical methods (100-word max, bullet point format encouraged):

Expected Outcomes (100-word max):
